

More than property listings

The only free, GIS-based property comparison tool on the 11-county Minneapolis-Saint Paul region.

Every site selection tool has property listings. Only **metroMSP.org** lets you build your own property-specific reports on consumer expenditures, demographics, workforce data, and nearby competitors/allies. You set the parameters. MetroMSP.org does the work – in seconds, and at no cost – using data-rich GIS-based mapping technology.

Taking the guesswork out of property comparisons.
